THE INDEXER

Published since April 1958

ISSN 0019-4131

The International Journal of Indexing

The only periodical in the Western world devoted specifically to all aspects of indexing.

Dr Hans H. Wellisch, author of *Indexing from A to Z*

I am impressed by the breadth of the coverage in such a highly targeted journal.

Dr Gordon Graham, Editor of *LOGOS: The Professional Journal for the Book World*

The information- and fun-packed publication for professional indexers everywhere

Marc Abrahams, Editor of *Annals of Improbable Research*

It should find a place in all library science collections and in the personal collections of professional indexers and indexing researchers and educators . . . a lively forum on highly specific questions representing a concern for good indexing.

Professor Bella Hass Weinberg in *Library and Information Science Annual*

Anyone doing professional/academic writing in the field of indexing knows that The Indexer is the publication of reference for the profession.

Nancy Mulvany, author of *Indexing Books*

Indexing is about helping those searching for information to find what they are looking for, whatever the medium – be it the printed page, still or moving images, artefacts in and out of museums, mathematical formulae and, of course, electronic data in all its vast variety.

The Indexer, a peer-reviewed journal, seeks to cover the full range of subjects, from articles at the cutting edge of new techniques to contributions discussing in a practical way the new tools available to indexers at all points in the technical spectrum, exploring how our predecessors did it back to the earliest of times, and considering the all-important human element. Its extensive reviews section covers both printed and electronic material, including websites and hardware and software of interest to the indexer, while 'Indexes Reviewed' highlights some of the best (and worst) examples of indexing in action. And, in 'Around the World', it keeps readers up to date with what is going on across the international indexing community. Stimulating and sometimes provocative, *The Indexer* is essential reading for everyone concerned with information accessibility and knowledge management.

A selection of articles is shown opposite. For a classified contents list and index to recent issues, visit
